

Centrifugal fans EB-N Series

EB-N

Centrifugal fans, with an approximate airflow of 100 m³/h at free discharge, back draft shutter incorporated, body and impeller made of polypropylene, 230V-50Hz motor, IPX2, Class II.
Specially designed for installations where pressure losses have to be overcome, to work at temperatures up to 40°C.

Attributes

Back draft shutter

Fitted with an automatic back draft shutter to prevent air entry and limit heat leakage when the extractor is not operating.

Forward curved centrifugal impeller

To deliver high performance with a minimum noise level against high static pressure system resistance.
