

Wall Mounted Axial Flow Fans HIB-P / HIT-P Series

HIB-P/HIT-P

Wall mounted axial flow fans with galvanised steel sheet structure, outlet louvre shutter with mechanical opening, inlet guard from galvanised steel and belt driven impeller from aluminium sheet (except Ø 800 direct driven models), powered by single phase (HIB) or three phase (HIT) motor. IP55, Class F.

Motors

Electrical supplies:

Single phase 230V-50/60Hz.

Three phase 230/400V-50/60Hz.

High-efficiency IE3 motors for three-phase models from 0,75 kW to 1,5 kW motors.

On request 60 Hz models and models without shade, with defense on the discharge side can be supplied.

Attributes

Compact design

Robust casings manufactured from galvanised steel sheet.

Outlet louvre shutter with automatic opening
when switching on the fan, to avoid its opening when it is not working.

Metalic protection guard on the inlet side, made from galvanised steel.

Protected belt-driven assembly

Trapezoidal belt drive protected by a belt guard from PVC

Ø 800 direct driven models.
