

Comparison of 2025 Values

Carbon footprint

Scope 1 and 2 (tCO2e/M€)

↑ +6,9%

Compared to 2024

↓ -54,6%

Compared to 2021
(first calculation year)

Electricity and gas consumption

Compared to loading hours

↑ +3,4%

(due to the expansion works of our Parets warehouse)

planet-friendly

Packaging material consumption

↓ -4,6%

Cardboard

↓ -14,7%

Plastic

↓ -1,3%

Wood

↑ +3,1%

EPS

2025 turnover compared to 2024

Water consumption

Compared to staff working hours

↓ 23,2%

Use of recycled PA, PP and PS

For the manufacturing of injection-molded parts

😊 >5%

Of the total amount of these materials in 2025

Self-consumption of electrical energy

Total energy consumed in 2025 compared to 2024 at Chaysol and Industries

↑ +6%

(reaching the current 32%)

S&P Industries:
Operational since July 2025

⚡ 18%

Waste generation evolution

This includes the waste that in 2025 represents 80% of the generated waste, weighted according to turnover

↓ -1,7%

Wood

↑ +5,1%

Metals

↓ -0,6%

General Waste

↓ -11,7%

Paper and Cardboard
